

Annual Listing of Obligated Projects

Fiscal Year 2021

Obligation of Federal Funding

An obligation is a legal commitment; the Federal government's promise to pay a State for the Federal share of a project's eligible cost. This commitment occurs when FHWA approves the project and executes the project agreement. Obligated funds are considered used even though no cash is transferred.

Funding for many Federal programs terminates at the end of the fiscal year for which it is appropriated. Federal-aid transportation funds, in contrast, are typically available for obligation for more than one year. When a federal agency makes a new apportionment or allocation for an ongoing program, it adds that amount to the program's unused balance from previous years. If, in an authorization act, Congress chooses to discontinue a program, any unused balance continues to be available for the period of availability that originally applied to the discontinued program.

Some types of funds—known as no-year or indefinite funds—are available until they are expended. However, as specified in law, under most of the major Federal-aid transportation programs, funds are available for obligation "...for a period of three years after the last day of the fiscal year for which the funds are authorized..."; thus, they are available for obligation for four years. For example, fiscal year (FY) 2016 Federal-aid highway funds that FHWA apportioned on October 1, 2015, are available for obligation until September 30, 2019. Note that outlays (expenditures) associated with timely-obligated funds may occur beyond the four-year obligation period.

This report lists the federal funding obligations that have been executed in Fiscal Year 2021.

Highway Projects

Federal-Aid Project Number:
