Item 4: Presentation on Innovations in Traffic Management

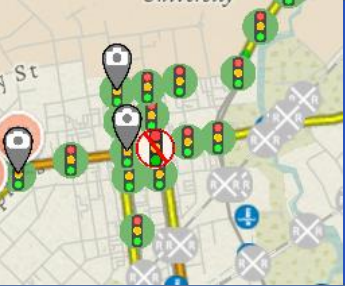

SMTX/Go

A Real-Time, Multi-modal Traffic Monitoring
and Traveler Information System

Sabas Avila, P.E., CFM
Director of Public Works
City of San Marcos

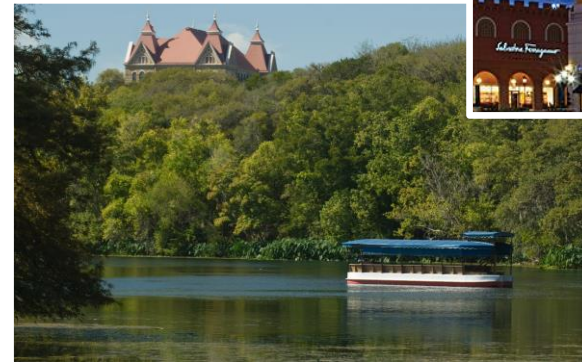

11/18/2024

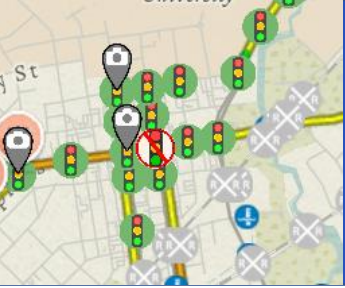

San Marcos, Texas

About the Community. San Marcos, TX is located on the I- 35 corridor between Austin and San Antonio. San Marcos is home to the 7th largest university in the state, TxState University, the San Marcos Outlet Malls, and the San Marcos River.

- **College Town:** Approximately 68% of TxState students are commuters
- **Commuters/Visitors:** approx. 14 million visitors/consumers a year.
- **Coordinated Transit system** between the City's Urban Transit system and TxState.
- Two **Union Pacific Railroads** bisect the city.

Why SMTX/Go?

- **Limited man-power**

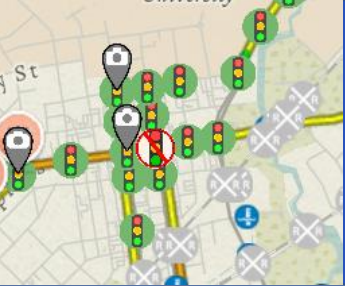

- ✓ Mid-sized cities do not have personnel that can monitor traffic in a TMC

- **Limited funds**

- ✓ System was developed in-house using off-the-shelf software

- **Need for coordination**

- ✓ Share information between departments (Public Works, Police, Fire, EOC, etc.)
- ✓ Share information from all multi-modal transportation partners
- ✓ Share information with the public
- ✓ Combine multiple sources into one viewer
- ✓ Does not require specialized software training or administrative access
- ✓ Improves coordination and efficiency

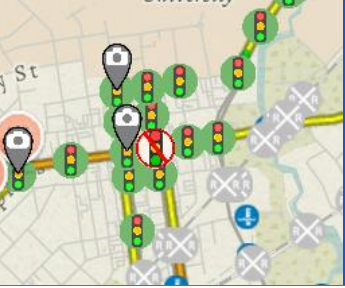

What is SMTX/Go?

A Real-Time Traffic Monitoring and Traveler Information System

- Combines near real-time traffic information/events from multiple sources into one easy-to-use map viewer
- Real-time Traffic Information includes:
 - ✓ Traffic incidents (Waze)
 - ✓ Traffic Speeds (Waze)
 - ✓ Construction/Event Closures (Waze)
 - ✓ Railroad Crossing Closures
 - ✓ Traffic Signal Status
 - ✓ Low-water Crossing Closures
 - ✓ Traffic Cameras
 - ✓ Public Transit
 - ✓ Microtransit (Spin scooters and bikes)

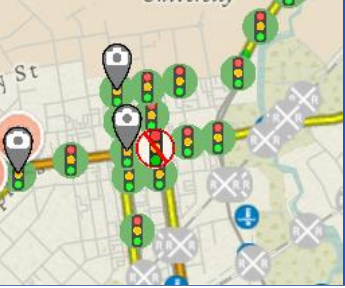

How Does SMTX/Go Work?

How does the system work?

- The map utilizes:
 - ✓ Internet of Thing (IoT) model
 - ✓ CoSM Traffic Signal Radio Communication Network
 - ✓ GIS
 - ✓ APIs

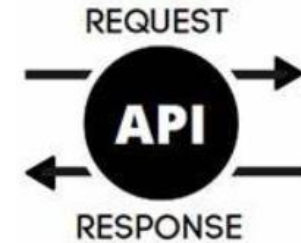

GeoEvent Server & API Calls

- **Application Programming Interface (API)**

An API allows different software applications to communicate and exchange data. It acts as an intermediary, defining how these applications should interact.

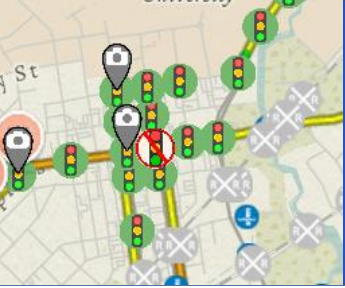

- **ArcGIS GeoEvent Server**

A tool that allows organizations to integrate real-time event-based data streams into their enterprise geographic information system (GIS).

SAN MARCOS, Texas (KXAN) — The City of San Marcos will launch a new bus tracker program to help transit users track down upcoming buses along their routes, city officials announced in a news release Monday. The tool has been developed in coordination between the City of San Marcos Public Works Department and Capital Area Rural Transportation Systems (CARTS), per the release.

SMTX/Go Highlights

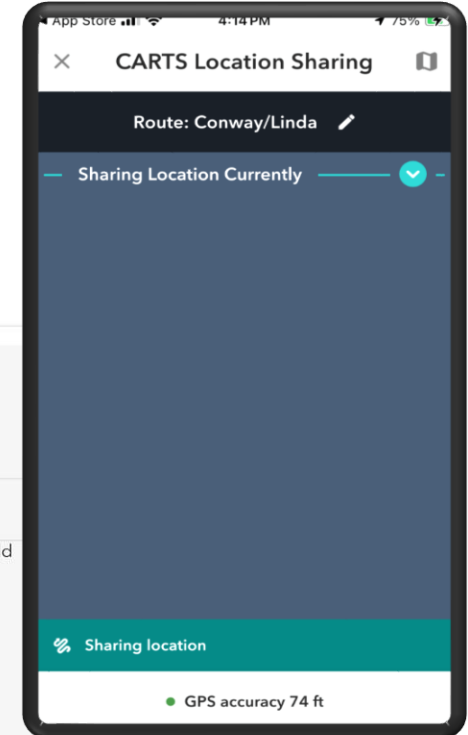

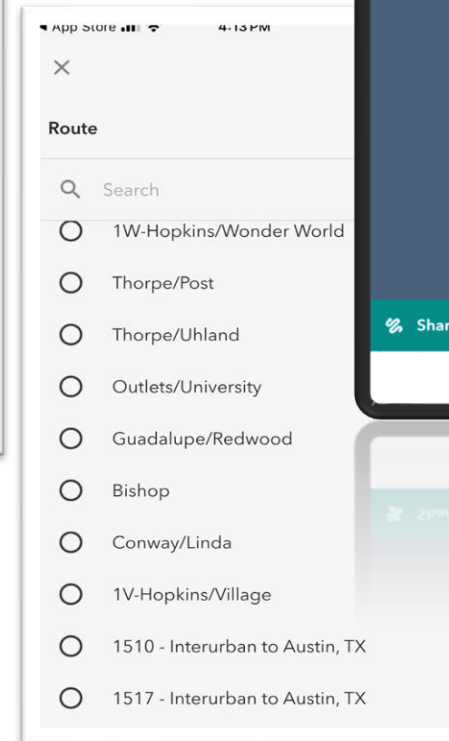

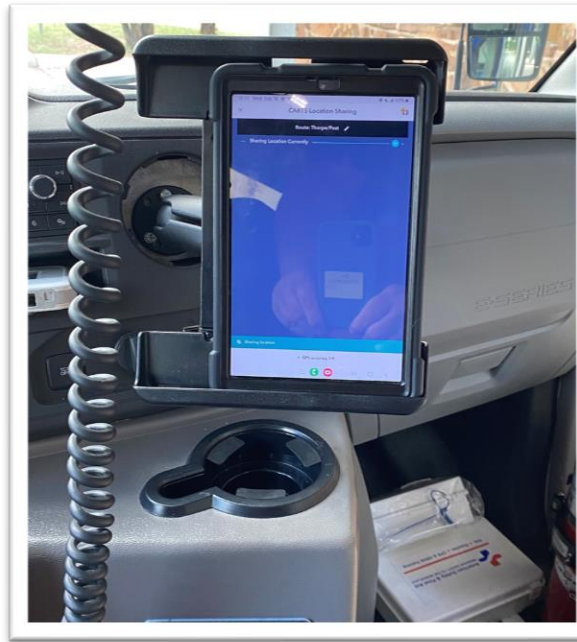

CARTS Bus Tracking

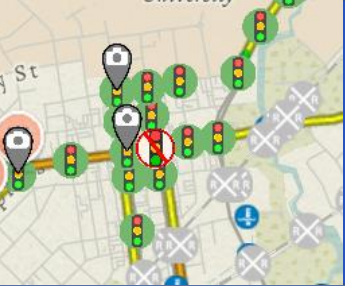

Buses outfitted with mobile devices, running ESRI Quick Capture

Quick Capture records bus latitude and longitude every 30 seconds

Bus location is sent to the Location Sharing layer in AGO

To make it publicly available, had to embed credentials, bit of a work-around

SMTX/Go Highlights

SPIN Scooters/Bikes

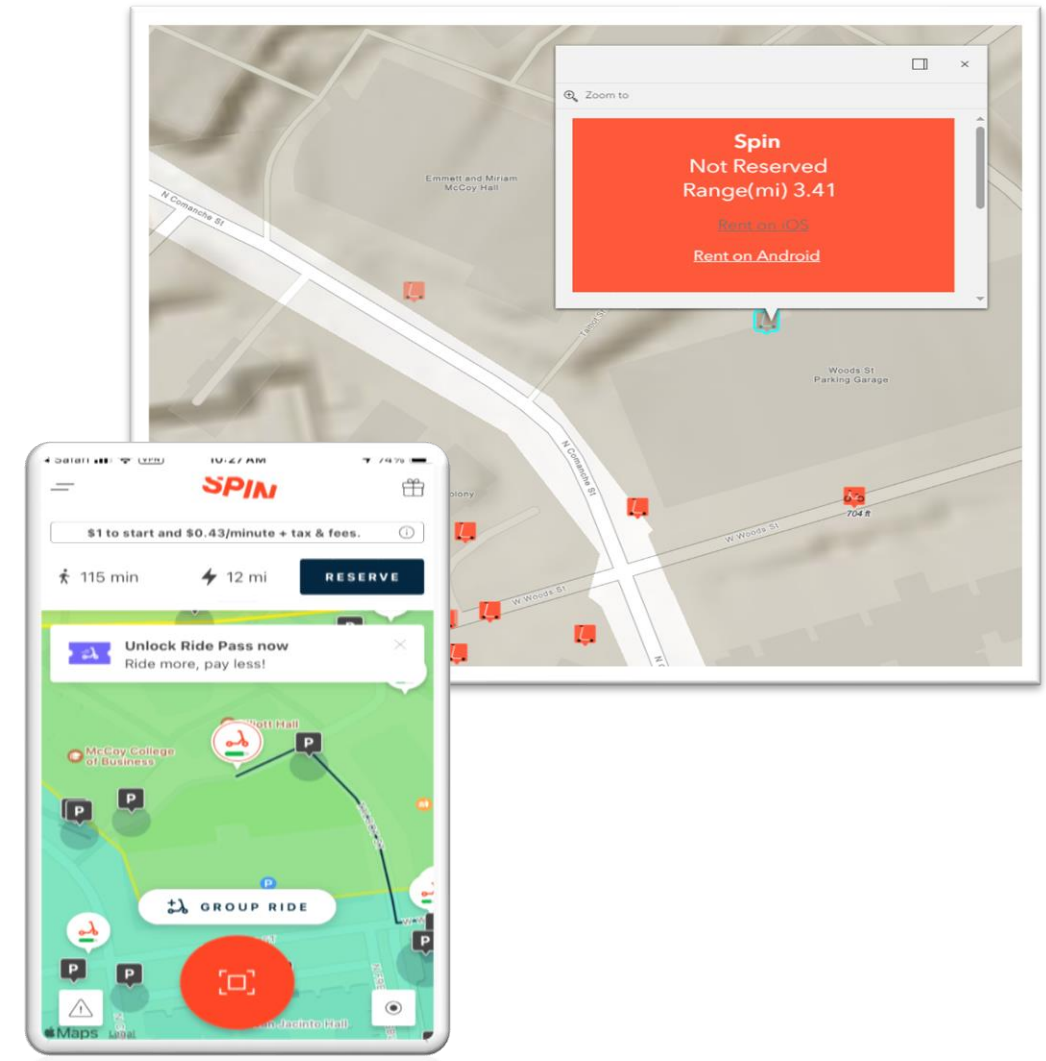

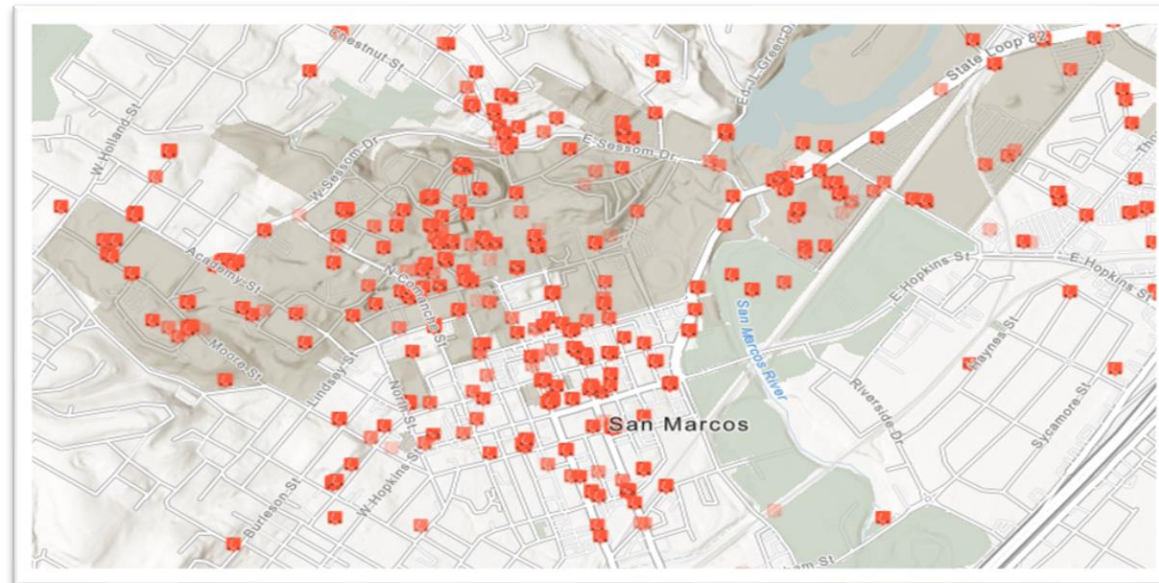

JSON data-feed provided by SPIN API – updates 60 sec.

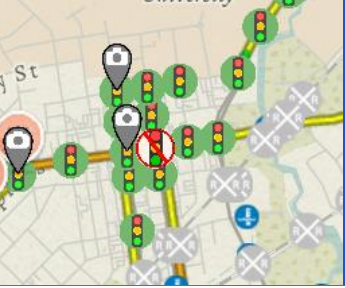

ESRI GeoEvent server populates GIS with SPIN data

Shows locations of available scooters/bikes

Scooter Symbol transparency based on battery range

Clicking a scooter presents a nice popup

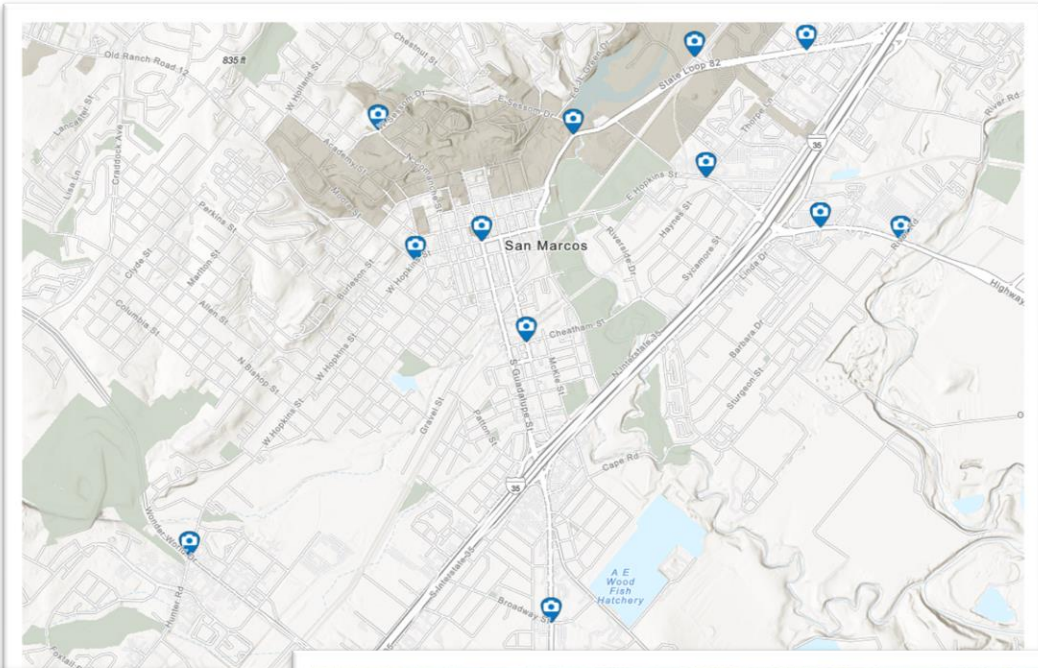

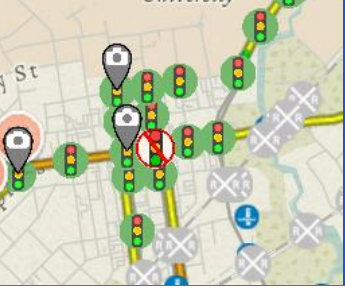

SMTX/Go Highlights

Traffic Cameras

- 20 locations
- Axis 6000 Series Cameras
- Traffic Manager can control them from the office, Pan Tilt Zoom
- Do not store footage, only real-time streaming video

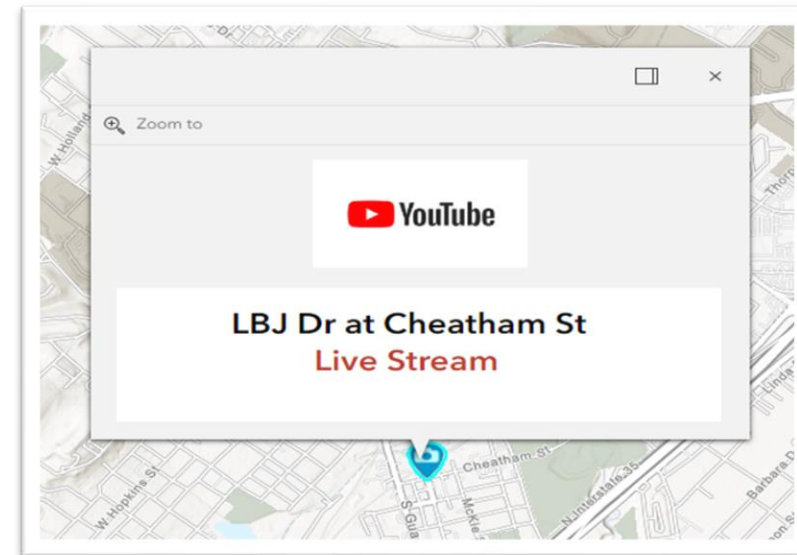

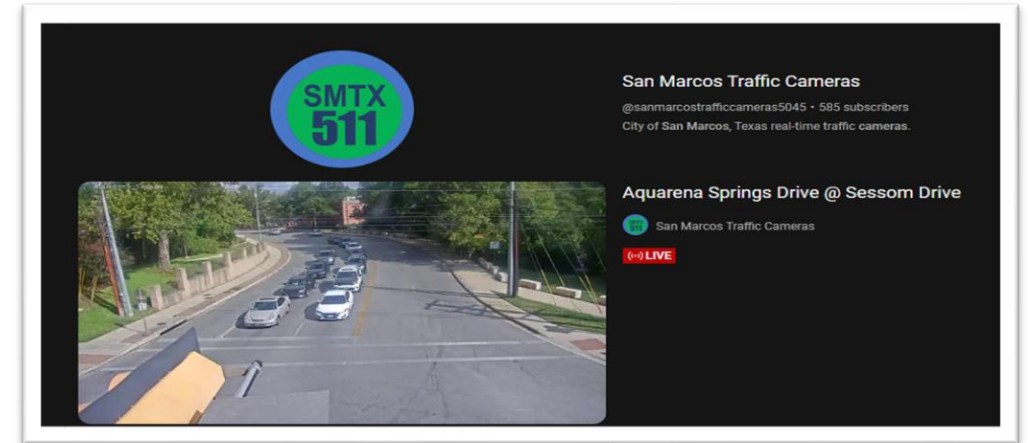

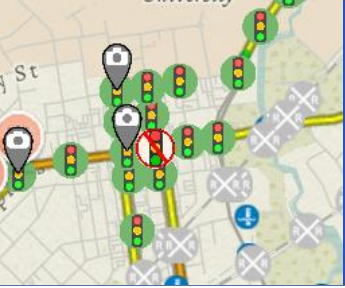

SMTX/Go Highlights

YouTube Solution

- Camstreamer App
- \$300 per camera. No reoccurring fees
- YouTube Channel "San Marcos Traffic Cameras"
- Linked to signal layer in SMTX/Go
- Streaming to YouTube allows us to utilize YouTube's servers
- YouTube Recorded video, 12 hours back

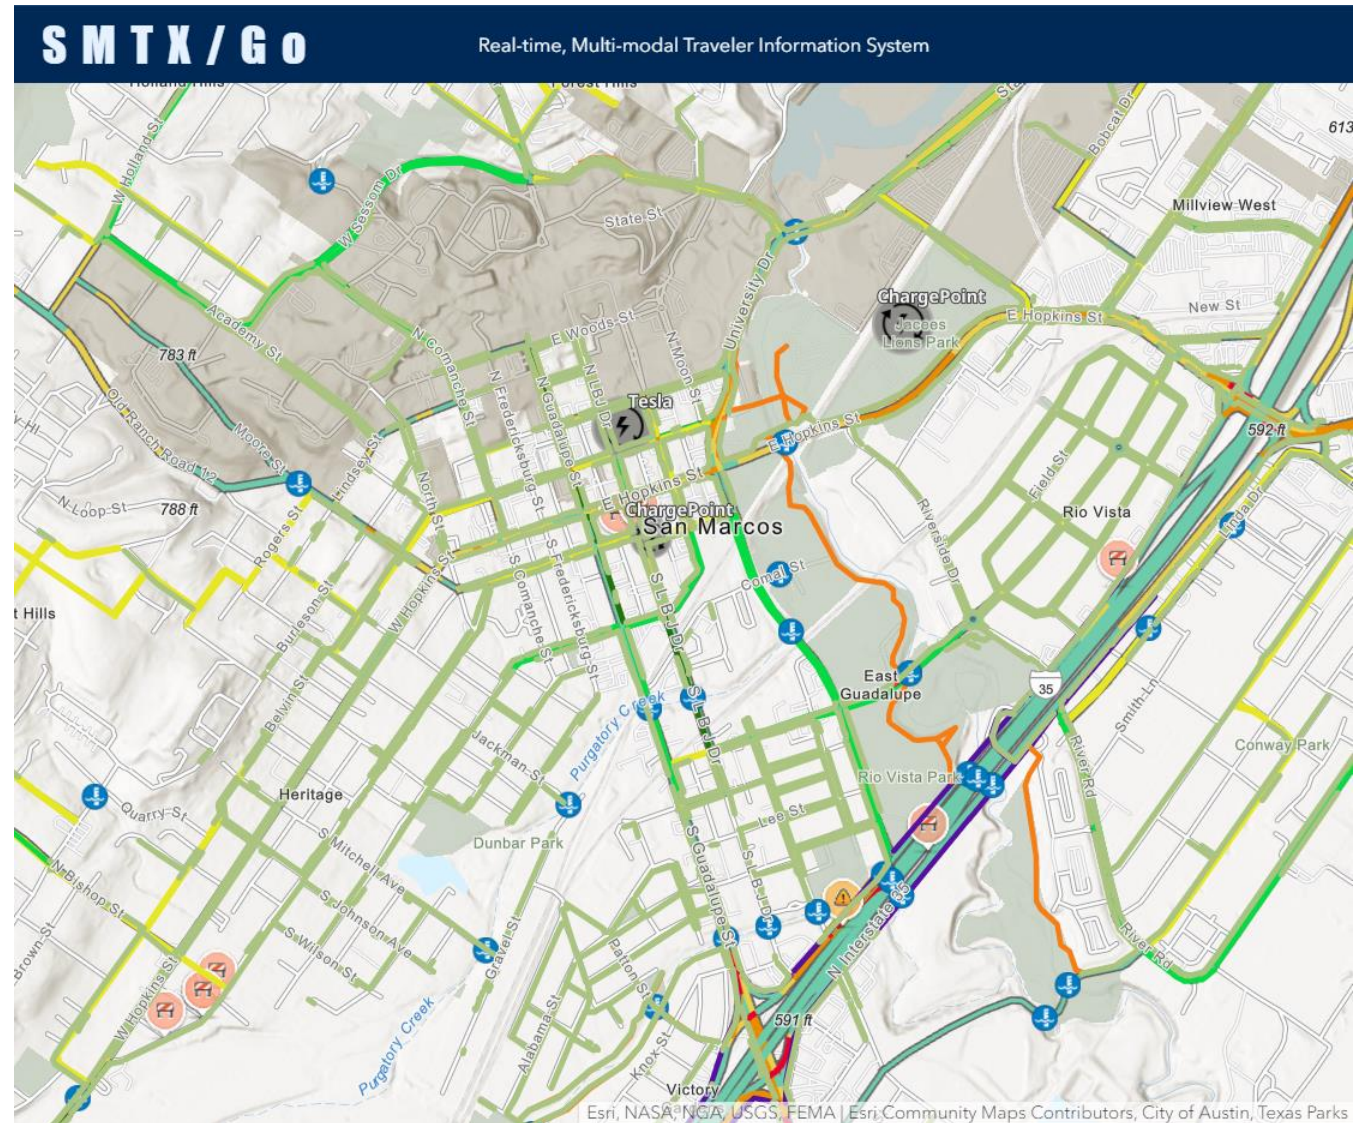

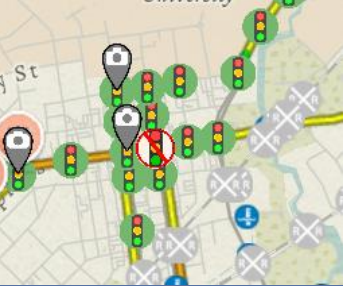

SMTX/Go Highlights

Additional Features include:

- Low-water Crossing Closures
- Sidewalk Layers
- Bike Lanes
- Traffic incidents (Waze)
- Traffic Speeds (Waze)
- Construction/Event Closures
- Drive Texas Road Closures
